PROFESSIONAL SUMMARY

Junior Frontend Developer with hands-on practice building responsive websites using HTML, CSS, and JavaScript. Familiar with Flexbox, CSS Grid, mobile-first layouts, accessibility basics, debugging, Git, GitHub, and website deployment. Looking for a junior role, internship, or freelance opportunity to build useful web experiences and continue developing practical skills.

TECHNICAL SKILLS

HTML5 and semantic markup • CSS3 and responsive web design • JavaScript fundamentals • Flexbox and CSS Grid • Mobile-first layouts • Accessibility basics • Debugging and browser testing • Git and GitHub • Website deployment • Graphic design

PROJECTS

BrandIt Concept — Responsive Multi-Page Website
Built a responsive six-page website concept, practicing page structure, styling, navigation, and layouts that adapt across screen sizes.

Personal Portfolio Website
Created a portfolio website to present frontend skills, selected projects, and contact links, with a focus on responsive layout and clear presentation.

Hotel Website Concept
Practiced building a hotel website interface with structured content, styling, and image-led sections to present accommodation and services.

EDUCATION

Yaba College of Technology (YABATECH)

Computer Science | Expected completion: 2031

CAREER INTERESTS

Junior Frontend Developer roles, internships, and entry-level freelance website projects.
